General Information

Atal Bihari Vajpayee – Indian Institute of Information Technology & Management, Gwalior (ABV – IIITM, Gwalior) is organizing a **two days workshop** on **"Cyber Security Technologies and Applications" "CSTA 2022" (online mode)** on 1st and 2nd June 2022. Candidates admitted for the workshop are expected to attend all the online sessions. A certificate of participation will be mailed to the participants attending all sessions.

Objective of the Workshop

The aim of the workshop is to bring together Researchers, Scientists, Engineers, and Faculty members from different parts of the country and will provide exposure to them in different art of Internet Security Risk through invited lecture series. Two days workshop on "Cyber Security Technologies and Applications" will be a platform for enriching the flavor of security risks in the Internet.

The past few years have been characterized by rapid changes in technology and the introduction of corporate and retail banking services through the Internet. The unprecedented speed with which new technologies are being adopted, the ubiquitous and global nature of electronic networks, the integration of e-banking platforms with legacy systems and the increasing dependence of banks on third-party information service providers, all dramatically amplify the magnitude of risks to which banks are exposed. Security controls need special attention because of the open nature of the Internet and the pace of technological changes.

This workshop discussion on new thoughts and ideas enlightens to continue the research on Cyber/Internet Security. In addition, online sessions with experts from premier Institutions from USA, IITs, IIITs, and Industry people will be the genesis for adventure.

Indicative Topics to be covered

- Introduction of Security Risks in the Internet
- Cyber Forensics
- Malware detection
- Blockchain technologies
- Cloud security
- Open Source Tools for Cyber Security
- Key Management Techniques and its applications
